- **A small vote of thanks for all who have helped me in this journey of App Development – my parents, Mr Ken, Clevered, Mentors, Group Members, Friends, Sites etc.**

About Me..

- Student's Photograph

- My name is Zahraa Atwi, I'm 12 years old, I'm so interested in AI and programing.

About My Internship with Clevered..

- Any photographs from sessions etc.

- My internship experience with Clevered was so nice, and I learned new things.
- Badges Earned **Rockstar Badge**

About App..

- App's Main Menu
No main menu
To start the game you should press the flag, and to stop it you should press on pause button.

- App's Introduction
This app is an adventure game using speech and voice recognition.

How do I use the App?

To start off, the user must press on the green flag. When clicked, the game asks the player to say "go forward" in order to enter the house. Next, the game uses speech synthesis and speech and voice recognition to ask the player several riddles and receive his/her answer to take him/her in a fun journey throughout the house rooms depending on each riddle, granting him/her with certain items from each room. Finally, he/she will find themselves stuck in the basement where he/she must say out loud the names of the items they got previously in order to receive in return a number for each item that allows the player to open the safe's lock found in the basement. To benefit from a hint in case the player got stuck or needed help, he/she must say "hint" so that the game provides him/her with the list of the items orally out loud. Finally, the game ends when the player says the correct code and opens the safe.

Option Name

(This will be repeated for each option of the App)

- Screenshot/ Pic of each option/screen of the App

- Steps to use the same
- You should have proper internet connection while using the app.

Contact Person
